WHO WE ARE

The **National Agency of Mineral Resources (ANRM)** is the Angolan public Institution responsible for the regulation, promotion and monitoring of prospecting, mining, trading and export of minerals and mineral products.

ROLE IN THE MINING SECTOR

ANRM performs its function over all mineral resources in the national territory, except for hydrocarbons and derivates.

ANRM ATTRIBUTIONS

• **Ensure** the rational use of the country's mineral resources;

• **Promote** the development of the mineral value chain in Angola;

• **Ensure** the restoration and stainability of the environment by mining operators;

• **Create** technical conditions, quality and safety standards for products and services in the mining sector.

SPECIFIC ATTRIBUTIONS

• **Instruct** the processes for granting mineral rights;

• **Plan, prepare and launch** mining concessions to the market;

• **Negociate** Mineral Investment contracts;

• **Monitor** the implementation of mineral investment contracts;

• **Monitor** the quality and content of minerals.

MINING RIGHTS

• **Prospecting Title** for the recognition, prospecting, research and appraisal of mineral resources.

• **Exploration Title** - for mining of mineral resources.

• **Mining Permit** - for exploration and mining of mineral resources applicable to civil construction (sand, burgundy, gravel, clay, red soils, etc).

• **Artisanal license** - for artisanal mining of mineral resources.

HOW TO ACESS MINNING RIGHTS

(art. 94 and 97 of the Angolan Mining Code)

• By **public tender**

• By **application** lodged at the ministry

WHO SHOULD APPLY

A **national or foreign juristic person**, with proven technical and financial capacity to carry out the mineral activity.

INITIAL DOCUMENTS REQUIRED
(article 100 and 101 of the Mining Code)

Letter addressed to the Minister responsible for Mineral Resources, indicating the intended Mining Right and the desired mineral resource, accompanied by

• Company incorporation documents;

• Personal details of the company representative;

• Location map of the required área in WSG-84 reference system and its description;

• Documents attesting the Suitability, Technical and Financial Capacity, namely:

- Experience of the legal entity in mining;
- Relevant work programme
- Description of minimum expenses;
- Copy of the balance sheet and accounts for the last three years.

FOR INVESTORS INTERESTED IN EXISTING PROJECTS

Letter of interest addressed to the Minister responsible for Mineral Resources, indicating the type of mining project (prospecting or exploration) and the desired mineral resource, with the following attachments:

- Legal documentation of the company;

- Updated photocopy of the identification document of the company's representative;

FLOWCHART OF THE PROCESS OF ATTRIBUTION OF MINERAL RIGHTS

1st Step(GABMIN):
1. Application form lodged to the Minister's office;
2. Application forwarded to ANRM;

2nd Step (ANRM):
1. Evaluation of the Application;
2. Response to the Applicant;
3. Publication of the application in the media;

3rd Step (GABMIN-ANRM):
1. Appointment of the Negotiation Commitee – Minister
2. Negotiation of the Mining Investment Contract - ANRM

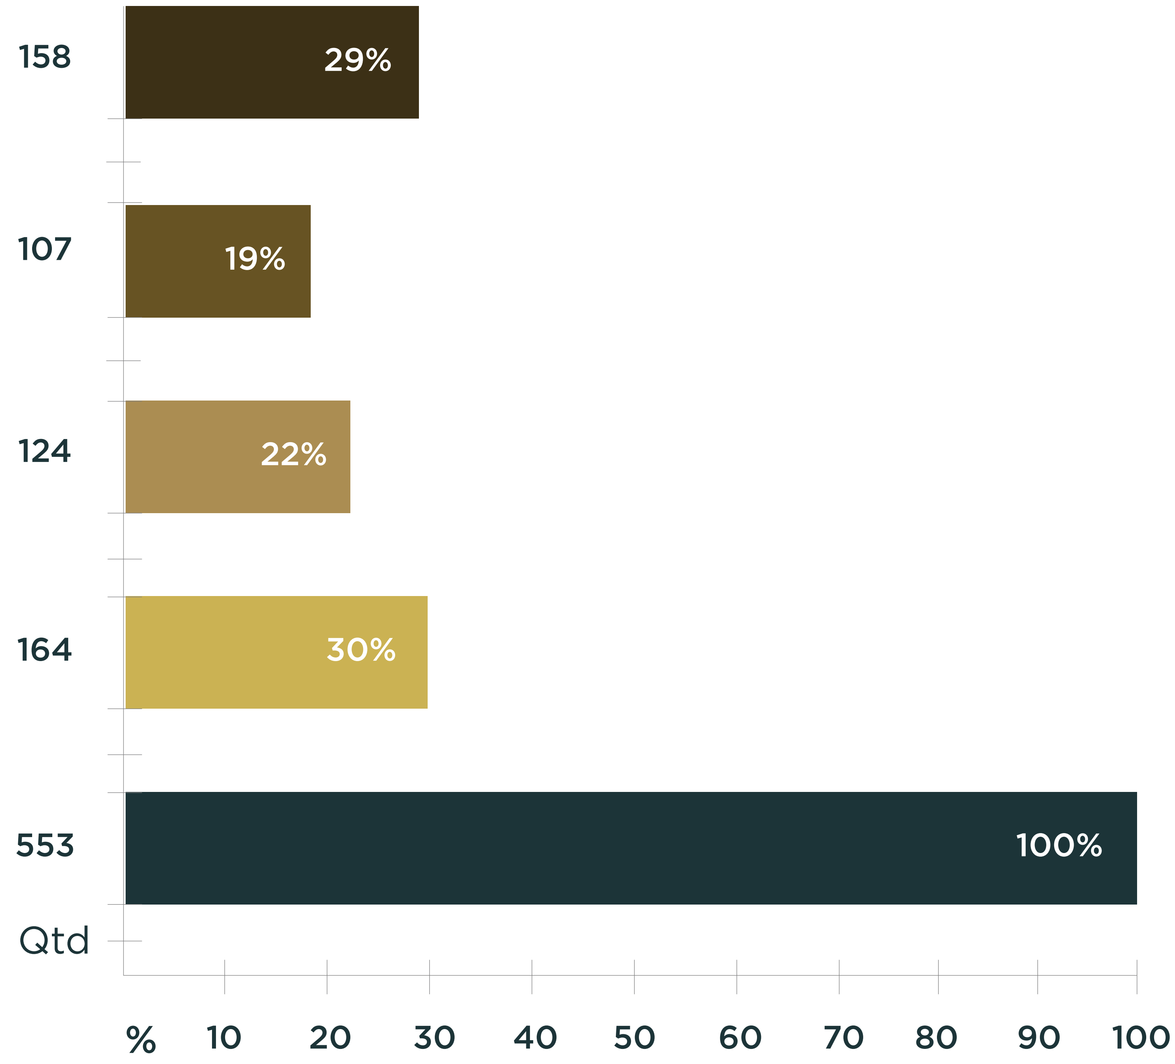

4th Step(GABMIN-ANRM):
1. Approval of the Mineral Investment Contract;
2. Signing of the Mineral Investment Contract;
3. Issuing of the Prospecting or Mining Title;

5th Step
1. Start Field Operation within 180 days

STATISTICS OF MINERAL TITLES

Mining Permit - **158** = 29%

Prospecting Permit - **107** = 19%

Exploration Title - **124** = 22%

Prospecting Title - **164** = 30%

Total - **553** = 100%

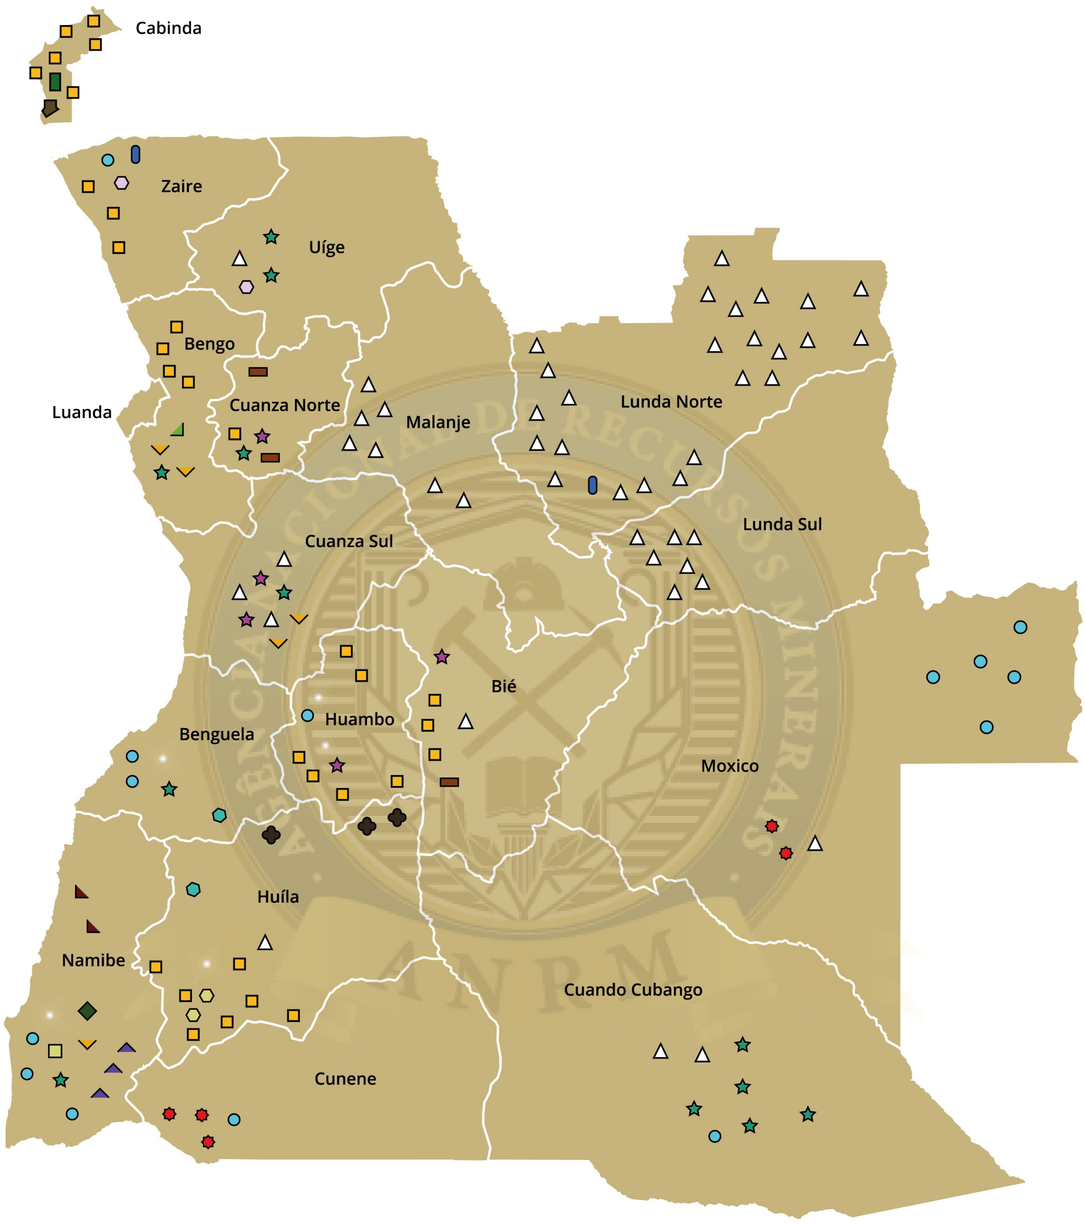

MINERAL RESOURCES IN EXPLORATION
BY PROVINCE

- Diamond
- Gold
- Copper
- Copper/Cobalt/Nickel
- Iron ore
- Basic Metals
- Ferrous Metals
- Silica Sand
- Limestone
- Quartz
- Noble Metals
- Gold/Copper
- Phosphate
- Potassium
- Galena
- Cobalt
- Rare Earth
- Beryllium
- Lithium
- Kaolin
- Gypsun
- Asphalt Rock
- Mineral Waters
- Manganese
- Calcite
- Clay
- Niobium

MINERAL RESOURCES IN PROSPECTION
BY PROVINCE

- Diamond
- Gold
- Copper
- Copper/Cobalt/Nickel
- Iron ore
- Basic Metals
- Ferrous Metals
- Galena
- Cobalt
- Rare Earth
- Beryllium
- Lithium
- Kaolin
- Gypsun
- Silica Sand
- Limestone
- Quartz
- Noble Metals
- Gold/Copper
- Phosphate
- Potassium
